Product Information

Product Name	d² Dura Type 100 Intermediate Panel
Product Description	Our Glass Reinforced Polymer (GRP) d² Dura Platform panels offer a low-carbon, lightweight, low-maintenance, durable and simple-to-install composite alternative to the traditional heavy-duty concrete platforms. The innovative design includes either manual lifting eyes or mechanical lifting arms. d² Dura Platform 100 has an excellent strength-to-weight ratio, and its lightweight nature means routine inspections of the substructure can be made easily. It is used as a platform extension system to help add passenger capacity and is lauded for its ability to reduce the substructure work and associated material costs. This EPD covers d² Dura Platform Type 100 Intermediate Panel. This profile has a thickness of 100mm and standard dimensions of 3700x600mm, although bespoke lengths may be possible, and is available in Dark Grey - this EPD covers all colour and size variations where applicable. The mass used for these slabs is 50.45kg/m².
